Night Creatures- Hunting and foraging at night is very different than during the day! Get ready for a fascinating discussion about heightened senses, as well as the advantages and disadvantages of nocturnal species. We will use two of our education animals as an example! You'll have a hooting good time!

Auditorium Program

In this program, a minimum of two educators and a variety of 5 animals will come to your site and offer an exciting, interactive animal show to your group. Engaging activities will pique the interest of all your students! This program is \$350, and 90 minutes in length. Serves an audience of up to 200 students.
